Labor and productivity – PET Tiger assists in building efficiency variables

Creating efficiency variables for your operation can take some work.

Each agricultural operation (grower, shippers, packers, labor contractors, greenhouses) has their own set of unique efficiency variables. Your geography, compensation policies, type of labor force deployed and expectations are all contributing factors. The type and quantity of these contributing factors vary widely between all agricultural operations. PET Tiger is a tool that will assist in compiling all these internal variables to your unique data base for efficiency variables creation.

Only when you measure piece-rate you can actually manage your labor force. By creating efficiency guidelines you can transform your management in ways you never realized before. By collecting piece-rate data in real time you can radically change your employee's performance as well as your bottom line.

PET Tiger is extremely easy to use and understand. It is a labor management tool that gives users a real time overview of what is going on in the field or packing house at any given time.

Users of the application add smart devices like iPhone, iPads, iPods, Android phones and tablets, and Windows Mobile devices as well as biometric clocks to the PET Tiger (Payroll Employee Tracking) system for the real time data collection.

The devices' app has self-explanatory buttons that are displayed on the main screen. Time and attendance is quickly managed along with productivity and equipment use. Records can be entered via touch screen, barcode scanning, RFID or biometric.

All data collected can be analyzed for payroll as well as cost accounting and available in real time via a notification procedure to all managers.

The benefit in deploying PET Tiger and the return on investment is immense – to maintain your operation and grow your business as well as to keep you on solid legal footing is a must! Engage with PET Tiger today's to meet these challenging economic times! Orange Enterprises, Inc. incorporates the newest mobile technology into today's payroll accounting software giving its user a seamless, paperless and wireless labor tracking solution.

We will assist you with any question on the phone, on-site and be with you on your computer screen in less than a minute. We have accumulated a vast amount of experience – working with thousands of Ag operations since 1984.

For more information on deploying PET Tiger in your operation, contact Udi Sosnik.
