News Release – Packing House Cost and efficiency instantly measured with PET Tiger’s New Management Module

Fresno, Calif., April 2, 2013 - Orange Enterprises Inc. has developed a tool that instantly determines the efficiency of packing house crews via a user-friendly barcode labeling system.

The module handles all aspects of payroll data collection for paying employees as well as labor contractor paid either by time or by piece.

The Payroll Employee Tracking software (PET Tiger) system tracks each piece in a packing line and measures the quantity of pieces against the pace at which crew members pack them.

Data is accumulated through barcode labels that are assigned to each employee. The labels identify the employee and the sequential number of pieces they have packed in a run to determine three things:

- The hours of the employee
- The number of pieces (categorized by size) the employee packed in that time
- Total number of pieces packed per run

Employees simply attaches barcode label to a form at the beginning and end of each run for continued and accurate traceability.

As the software measures the data, it automatically creates a color-coded Run Projection which determines whether or not an employee is on track to reach their targeted goal.

In gauging the employee’s pace, the software projects when the load will be finished and assigns a project completion time based on the working pace of each run. In real time, the screen of the device recording the data will be green, to indicate that the rate at which the employee is working will be fast enough to complete the load by the targeted time, or red to indicate that they will not.

Each day, the Run Supervisor creates a job card indicating the duration of every completed run under his supervision. Those hours are cross referenced with the supervisor’s to validate the appropriate allotment. If there are any discrepancies, an error message will occur.

The system is extremely easy to use, simple to learn and minimal hardware is required. For more information on the PET Tiger label traceability module, contact [Udi Sosnik](mailto:Udi.Sosnik@OrangeSoftware.com) at Orange Enterprises Inc.

Orange Enterprises, Inc. incorporates the newest mobile technology into today’s payroll accounting software giving its user a seamless, paperless and wireless labor tracking solution.
